

Assure 365 **Fully Managed Microsoft Security Service**

Let CyberOne and Assure 365 strengthen your cyber resilience, so you can focus on delivering business success.

In today's rapidly evolving cyber threat landscape, organisations are confronted with the dual challenge of defending against increasingly sophisticated risks while navigating, managing and utilising the growing complexities of today's security solutions.

CyberOne's Assure 365 solution offers a Fully Managed Microsoft Security Service that not only strengthens your organisation's cyber resilience but also maximises your Microsoft investments.

Our team of Microsoft experts will embed themselves into your organisation, tailoring our approach to your specific priorities and requirements and aligning with best practices to ensure a seamless integration that strengthens your security posture.

By shifting the focus from technical protection to organisational resilience, we empower businesses with actionable intelligence to inform strategy, drive innovation and demonstrate clear ROI.

Common Cyber Security Challenges:

-  **Rapidly advancing cyber threats** requiring an ongoing proactive approach.
-  **Talent shortage and technical resource constraints** to effectively manage security.
-  **Staying compliant with evolving regulations** and standards is essential for integrity.
-  **Insider threats from within the organisation** is a critical aspect of security.
-  **Data confidentiality, integrity and availability** assurance is crucial in a digital-first world.
-  **Unauthorised apps and uncontrolled shadow IT** increasing your organisations attack surface.
-  **Ability to quickly detect and respond to incidents**, reducing potential damage.
-  **Increasing complexity of security technologies** requiring expert management.
-  **Preventing unauthorised access** is crucial through robust identity and access management.
-  **Maintaining a strong cyber security posture** is necessary to deter and withstand attacks.
-  **Ensuring full utilisation of security technology** to maximise resilience.
-  **Optimising technology investments** and aligning with organisational priorities and requirements.

Introducing Assure 365 from CyberOne

A True Extension of Your Team

-  **Market Leading & Fully Integrated Microsoft Security Solution**
-  **Security Hygiene, Policy & Processes**
-  **24x7 Managed Monitoring, Detection, Response & Recovery**
-  **Managed Support Across Users, Data & Endpoints**
-  **Strategically Focused Cyber Reporting For Business Leaders**

Delivering a Measurable Difference

-  **Day Zero Maturity & Rapid Risk Reduction**
-  **Reduced Total Cost of Ownership & Fully Realised Microsoft Investment**
-  **Continuously Improved Cyber Resilience**
-  **Operational Efficiency Enabling Organisations To Prosper**
-  **AI & Microsoft Copilot Ready**

The CyberOne Assure 365 Solution

Identity & Access Management
Ensuring the integrity of user identities and access within an organisation is fundamental and core to our business.

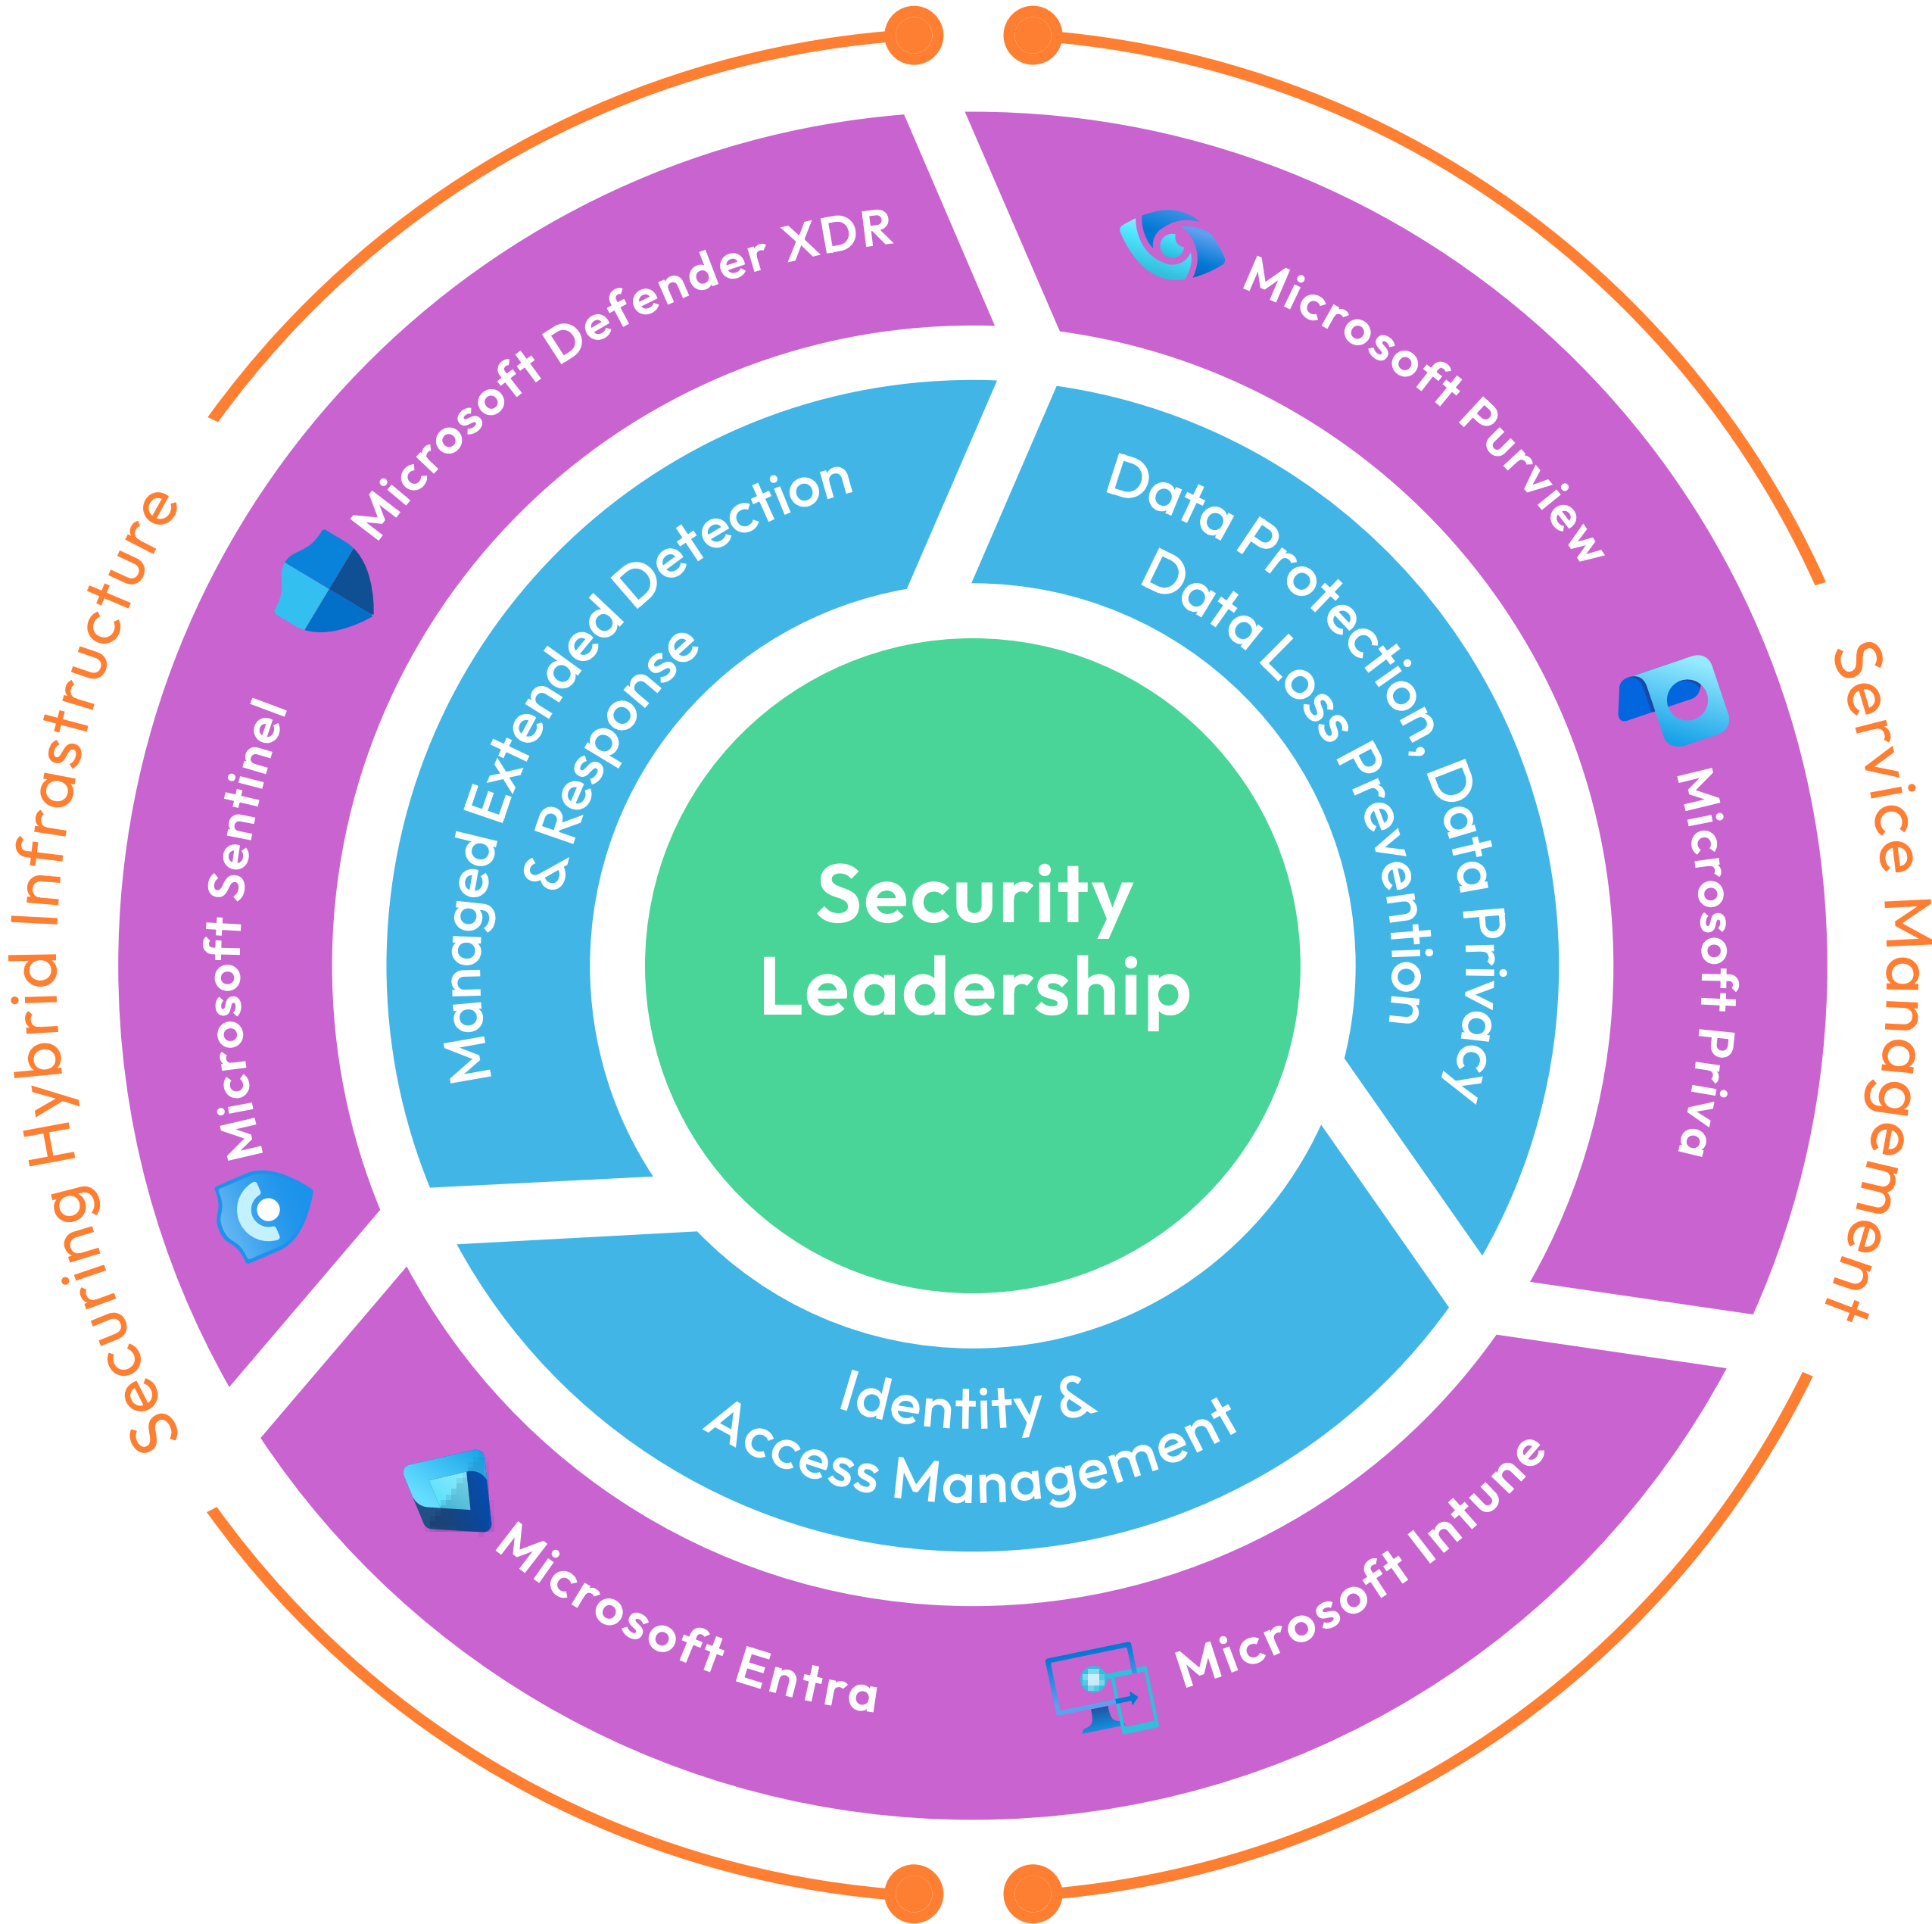

CyberOne deploys Identity Protection and Multi-factor Authentication, managing Privileged Identity Management and applying Conditional Access Policies. Seamlessly integrated through **Microsoft Entra** and **Microsoft Intune**, this not only secures critical access points but promotes passwordless access, enhancing the overall security of user identities.

Data Protection, Data Privacy & Loss Prevention
Implementing robust data security and privacy controls.

Harnessing **Microsoft Purview** and **Microsoft Priva**, CyberOne only ensures the protection of your data assets and prepares them for AI technologies like Microsoft 365 Copilot. Encompassing Information Protection and Encryption, Data Loss Prevention, Insider Risk Management, Privilege Access Management, Privacy Risk Management and handling of Subject Rights Requests, Assure 365 provides comprehensive data protection.

Managed Extended Detection & Response
Experience continuous Managed Extended Detection & Response capabilities.

Utilising **Microsoft Sentinel** and **Microsoft Defender XDR** for 24x7 monitoring, detection and rapid response to minimise the impact of security incidents. Assure 365 includes protection for identity, Microsoft 365, endpoints and cloud applications to ensure a comprehensive defense against cyber threats.

Service Management
Ongoing management and monitoring to maintain up-to-date and effective security policies and practices.

Assure 365 delivers measurable improvements and strategic cyber reporting for business leaders, enabling informed decision-making and demonstrating tangible ROI.

Securing Hybrid Infrastructure
Secure hybrid infrastructure and ensure protection across multi-platform and multi-cloud environments.

Assure 365 provides support through an IT help desk and specialist security services, providing comprehensive coverage for your organisation's diverse technological requirements and needs.

Security Leadership
Enhanced security leadership and establishing strong governance frameworks.

Assure 365 leverages **Microsoft Secure Score** to assess and continuously improve your security posture and resilience, ensuring that your organisation's defences evolve in tandem with the ever evolving threat landscape.

Your Road to Cyber Resilience

An End-to-End Managed Microsoft Security Transformation.

1 Assess

The transformation begins with a comprehensive assessment of your security landscape.

Prioritising interviews with key stakeholders to understand your unique challenges and needs is followed by quantifying your security posture, by leveraging Microsoft Secure Score.

2 Mature

A minimum security hygiene across your Microsoft 365 estate will be put in place.

This critical phase is designed to provide rapid risk reduction and increased resilience, setting the stage for advanced security enhancements.

3 Harden

A series of remediations and robust hardening tasks will be performed.

This phase elevates your security from the baseline to a “Super Hardened” posture, incorporating industry best practices to bolster your defences.

4 Manage

CyberOne’s team of experts will provide ongoing managed security services.

This ensures that your environment remains in alignment with the latest best practices and adapts proactively to the evolving security landscape.

5 Inform

Empowering leaders with intelligence to inform strategy and demonstrate ROI.

Deployment of Microsoft Sentinel and engagement with our Security Operations Center to deliver continuous monitoring and response, safeguarding your organisation 24x7.

Your Security, Our Priority. Guaranteed.

- **Defend at Speed:** Immediate reply to security alerts within 15 minutes for critical issues 24x7, with a 99% performance target.
- **Swift Analysis:** Quick identification and triage of security incidents, completed within 1 hour for critical cases, ensuring prompt action and resolution.
- **24x7 Support:** Continuous monitoring, support and expertise from our Global SOC, with guaranteed round-the-clock vigilance.
- **Proven Expertise:** Leverage our long-standing experience and deep Microsoft Security expertise for seamless integration and enhanced protection.
- **Peace of Mind:** CyberOne's globally accredited cyber security services ensure your data is protected and your organisation is resilient.

The CyberOne Difference & What It Means For You:

- **Proven Cyber Security Experience**
MSSP Since 2005: Demonstrating our long-standing expertise and deep experience in cyber security.
- **Deep Microsoft Security Expertise**
Security Solutions Partner with Advanced Threat Protection specialism, benefiting from our strong collaboration with Microsoft.
- **Accredited By World-Leading Standards Bodies**
Affirming our world-class service quality: NCSC Incident Response, CREST CIR, SOC & Penetration Testing and ISO 27001 compliance.
- **People, Process & Technology Innovation**
Utilising iterative real-time indication to detect and analyse administration events to reduce response times, increase consistency and reduce the noise giving more time for analyst investigations.
- **Demonstrable Resilience**
Risk Reduction and IT Resilience: Measured by our ability to minimise business risk and reduce IT downtime, ensuring operational continuity.
- **Maximising Security, Utilisation & Investment**
Optimise Costs, Fully Utilise & Leverage Existing Assets: Incorporating our solutions into existing Microsoft technology.
- **World-Class & Trusted Cyber Security Partner**
From assessment and governance, baseline setting to deployment, management and continuous improvement designed to build a more resilient future.
- **Superior Defence. Delivered At Speed**
Industry-leading SLAs: Our commitment to rapid response ensures minimal disruption, maximum security and peace of mind.

Previously, while working as a Global CIO for a FTSE 100 organisation, we collaborated with CyberOne to mature our cyber security strategy and its implementation. That positive experience with CyberOne has brought me back, this time leveraging Microsoft Security and their Assure 365 Managed MXDR Service.

Drawing from my prior hands-on experience, it was reassuring to work with some of the same professionals who had previously delivered successful results. CyberOne excels at delivering fast and effective outcomes. Now, I see comprehensive visibility across our stack, receive regular reports and feel much more confident that Alysian's security is significantly improved with CyberOne.

About CyberOne

Trusted by some of the most admired brands and organisations, CyberOne is dedicated to delivering end-to-end Microsoft Security solutions to secure mission-critical operations. We combine the best technologies with the brightest talent to deliver solutions tailored to your vision and growth objectives.

From cyber security reviews and remediation, penetration testing, incident response and recovery, to the deployment of integrated security services, Assure 365, our Managed Microsoft Security Service, ensures that your business remains resilient in the face of any threat.

Since 2005, CyberOne's mission has been to make the digital world a safer place, working closely with Microsoft. We measure our impact by our ability to reduce business risk and IT downtime. It's about building a secure foundation for your business to thrive, supported by a partnership that enables you to focus on delivering business success, while CyberOne delivers resilience without compromise. Securing today, safeguarding tomorrow.
